

It's About Time

Stand-alone Solution

Overview:

Any size business in any market segment that need to control and monitor employee's clocking timesheets. The Viper TNA Software seamlessly manage clocking times with an export function to import into major payroll systems.

Process:

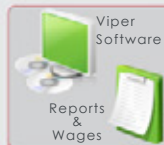

- Install Fingerprint or Facial devices at each remote site.
- All devices are connected via office network to computer with software.
- Transactions can also be manually transferred to computer via USB stick.
- Viper TNA software calculates all hours worked including overtime etc.
- Export function fully integrated with major payroll systems (VIP, PASTEL, etc)
